

It is well known that people in Kenya live in particularly harsh circumstances. The people of the ethnic group Masaai in the district of Narok have this extremely difficult. If you will still need to live with a disability, the suffering is almost Unbearable. After all the aid as we know it in Germany, there is not. On top of the poor water supply, lack of sanitation facilities, inadequate sterility, malnutrition. Well over half the people in Narok County live below the poverty line.

Already in 2014 were collected from us aids, clothing and toys for the poorest of the poor in the district of Narok, which could then be passed in time for Christmas 2014. In May 2015 our friends from Kenya came to visit again, to look at the situation and possibilities of persons with disabilities in Germany. Here is the complete supply is mostly on the health and nursing care insurance funds, as well as pension funds and professional associations. There is mobility training, handbike camps, rehabilitation. Sports equipment are indeed at first glance expensive, but above all affordable second-hand through numerous online resource exchanges.

In the week when our friends come to visit, we like to show how the care of people with various types of disability is here: It was visited a workshop for people with disabilities, a rehabilitation group has been viewed, shown sporting facilities and even tested. During excursions our friends were able to see that it is possible for us to travel as a person with disability alone. Although in our eyes, for example. traveling by train is not always optimal - but it is possible. Also you can not always see everything right, because, for example Elevators are missing (especially in landmarked buildings), but we can just go and maybe enjoy the view from a neighbour building. We weight with an entirely different scale - and that's not always right. Let us keep more in mind that there are people like the Masaai in the district of Narok County, who do not even have the possibility to have the life of their family in part because they do not come due to lack of resources from the bed to the table and back. How can a kid then cover with disabilities to go to school in large centers? How can an adult with disabilities to travel the way to his training or work? Unfortunately, especially people with disabilities from the major aid agencies are not explicitly supported. Therefore we would like to accept those and help as much as possible. For this we need your help!

Of course we took a lot of time for discussions and elaborated plans for further cooperation. So, you now have the opportunity to be SPONSOR. Become a sponsor of a child or even an adult and support you with your sponsorship a person through life. You can in this way to finance your godchild a school and an education and allow finally work, and required resources.

It is also important that people in Narok County have the opportunity to do sports. This promotes self-confidence and strengthens the people, they are motivated and inspires.

Shortly you will find here small Profiles and pictures of needy people in Narok County.

But donations can be done now. You have two options!

Donations:

- \* Wheelchairs
- \* Sport Wheelchairs
- \* Rollators
- \* Crutches
- \* Catheter
- \* Bandages
- \* Korsets
- \* Orthoses
- \* Protheses
- \* Dressing
- \* Disposable gloves
- \* Canes
- \* Glasses, loupes
- \* Handbikes and preload Bikes
  
- \* Clothes and shoes in all sizes
- \* Toys for all ages
- \* Books exclusively in English
- \* Satchel containing: filled pencil cases, 10 large and 10 small books, one each 5 cross an lines, A4 paper, water color box with brush, loose-leaf binders, folders narrower, lunch box, water bottle
  
- \* functional laptops
- \* USB flash drives, external hard drives
- \* functional phones
- \* Water heater
- \* Hotplate, electric pans (so-called. "Party pan")

With monetary donations you can give your godchild allowing:

- \* the way to school
- \* School attendance
- \* the way to the training place
- \* Training Course
- \* Food
- \* Transport of the required tools and support packages
- \* Doctor visits
- \* Sports facility
